A NEAT TRICK.

A Chicago Detective Taken In and Le There.

Chicago, Aug. 12.-A smooth-lookin ittle man arrived at the Palmer hou Tuesday and registered as Dr. C. Mooro, of New York. He was accompanied by a man who called himself C. M. Bure, and with the two came four large trunks. While the strangers were astonishing the other guests by the number and elegance of their costumes the police received a telegram requesting them to look out for E. G. C. B. Dumas, who had forged the name of the Lowell Arms Co., of Boston, for \$650, had secured the money and loft.

New York for Chicago.
Yesterday Detective Bailey located the strangers at the Palmer, and learn ing that one of "Dr. Moore's" trunks bore the name of E. G. C. B. Dumas arrested the doctor at the office. The doctor was indignant and told the de-tective to come to his room and he would prove his innocence. After ontering the room the doctor, who turns out to be the much-wanted Dumas opened a trunk and began rummaging among its contents. While Italloy's attention was thus distracted Dumas sprang out of the door, locked it on the outside, stole quietly down stairs and escaped. The imprisoned detective was released by a chambermaid a few morents later and left the botel in a rements later and left the hotel in a rements later and for the doctor has been plugged so could be imagined. Here's What the Plasterers Think of ROCK PLASTER.

WE THE UNDERSIGNED, contracting plasterers, after much experience and observation, take pleasure in testifying to the practical character of ROOK PLASTER, and while it will remove a not inconsiderable amount of business, namely that of patching, we advocate its use, as it enables us to do work and guarantee the results, and enables us to carry on our trade at all seasons of the year, and modernizes that part of building enterprise which has undergone practically no improvement in the last two thousand years, placing the business of the plasterer on the same footing as that occurred by the attack the advent of machinery pied by the other trades through the advent of machinery and improved methods.
